Due to an error in processing the data, we have published wrong values of  $EW_0$  in Table 1 in the original paper, published 2009 April 16. The true values are derived by the multiplication of 0.83 to the values in Table 1 in the original paper. As a result, Figures 9 and 10 are incorrect in the original paper. The correct versions of Figures 9 (top) and 10 are presented here.

The Ly $\alpha$  luminosity functions (LFs) of our sample in Figures 7 and 8 are corrected for the absorption by intergalactic neutral hydrogen as in Figure 4(a) in Ouchi et al. (2003, ApJ, 582, 60). The correct caption to Figure 7 is “the Ly $\alpha$  LF of our sample that is corrected for the absorption by intergalactic neutral hydrogen as Ouchi et al. (2003)” instead of “the Ly $\alpha$  LF of our sample.”

These do not change any discussion in the text.

We thank Masakazu A. R. Kobayashi for bringing these errors to our attention.
