ADDENDUM TO: [JHEP11\(2015\)205](#)

ABSTRACT: This is an addendum to the article [JHEP 11 \(2015\) 205](#) [1]. The figures 3 (right), 4 (right) and 5 are updated with published results on non-prompt  $J/\psi$ -meson production from the CMS collaboration [2].

ARXIV EPRINT: [1506.06604](#)

In [1] the average nuclear modification factor  $R_{AA}$  of  $D^0$ ,  $D^+$  and  $D^{*+}$  mesons in Pb–Pb collisions at  $\sqrt{s_{NN}} = 2.76$  TeV measured by ALICE was compared with that of non-prompt  $J/\psi$  mesons from B-meson decays measured by the CMS collaboration using 2010 data ( $7.28 \mu\text{b}^{-1}$ ) [3]. A higher-precision measurement based on 2011 data ( $152 \mu\text{b}^{-1}$ ) was recently published by the CMS collaboration [2]. The measurement for the  $p_T$  interval 6.5–30 GeV/ $c$  is carried out in three rapidity intervals, including  $|y| < 1.2$ , which is more similar to that of D mesons ( $|y| < 0.5$ ).

Figure 1 shows the average of the  $D^0$ ,  $D^+$  and  $D^{*+}$  nuclear modification factors as a function of centrality in  $8 < p_T < 16$  GeV/ $c$ , compared with the  $R_{AA}$  of non-prompt  $J/\psi$  mesons with  $6.5 < p_T < 30$  GeV/ $c$  [2]. The latter is significantly higher than that of the D mesons in the five centrality intervals from 0–10% to 40–50%. For example, the average difference of the  $R_{AA}$  values of D mesons and non-prompt  $J/\psi$  mesons in the 0–10% and 10–20% centrality classes is larger than zero with a significance of  $3.4 \sigma$ , obtained including the systematic uncertainties, and taking into account their correlation between

**Figure 1.** Comparison of the D meson  $R_{AA}$  (average of  $D^0$ ,  $D^+$  and  $D^{*+}$ ) in  $8 < p_T < 16$  GeV/c [1] and of the  $R_{AA}$  of non-prompt J/ $\psi$  mesons in  $6.5 < p_T < 30$  GeV/c measured by the CMS collaboration [2]. The vertical bars represent the statistical uncertainties, while the filled (empty) boxes represent the systematic uncertainties that are correlated (uncorrelated) among centrality intervals. This figure updates figure 3 (right) of [1].

**Figure 2.** Comparison of the  $R_{AA}$  measurements with the calculations by Djordjevic et al. [4] including radiative and collisional energy loss. Lines of the same style enclose a band representing the theoretical uncertainty. For non-prompt J/ $\psi$  mesons in  $6.5 < p_T < 30$  GeV/c [2] the model results for the case in which the b quark interactions are calculated using the c quark mass are shown as well [7]. This figure updates figure 4 (right) of [1].

the two centrality classes. In figures 2 and 3 these measurements are compared with model calculations [4–6], as originally done in [1].

**Figure 3.** Comparison of the  $R_{AA}$  measurements with the  $MC@sHQ+EPOS2$  model [5] including radiative and collisional interactions (left) and with the  $TAMU$  elastic model [6] including collisional interactions via in-medium resonance formation. For both models, results for the case in which the b quark interactions are calculated using the c quark mass are shown as well [7]. In the right-hand panel, the band between lines with the same style represents the theoretical uncertainty. This figure updates figure 5 of [1].

The conclusions of the original publication [1] are confirmed by the comparisons that consider the new  $J/\psi$ -meson measurements. In particular, the comparison of the D-meson  $R_{AA}$  with the non-prompt  $J/\psi$ -meson  $R_{AA}$  shows a difference in the suppression of particles originating from c and b quarks in the most central collisions. This observation is described by theoretical calculations in which in-medium parton energy loss decreases with increasing quark mass.

99 *Russian Federal Nuclear Center (VNIIEF), Sarov, Russia*  
100 *Russian Research Centre Kurchatov Institute, Moscow, Russia*  
101 *Saha Institute of Nuclear Physics, Kolkata, India*  
102 *School of Physics and Astronomy, University of Birmingham, Birmingham, United Kingdom*  
103 *Sección Física, Departamento de Ciencias, Pontificia Universidad Católica del Perú, Lima, Peru*  
104 *Sezione INFN, Bari, Italy*  
105 *Sezione INFN, Bologna, Italy*  
106 *Sezione INFN, Cagliari, Italy*  
107 *Sezione INFN, Catania, Italy*  
108 *Sezione INFN, Padova, Italy*  
109 *Sezione INFN, Rome, Italy*  
110 *Sezione INFN, Trieste, Italy*  
111 *Sezione INFN, Turin, Italy*

- 112 *SSC IHEP of NRC Kurchatov institute, Protvino, Russia*  
113 *SUBATECH, Ecole des Mines de Nantes, Université de Nantes, CNRS-IN2P3, Nantes, France*  
114 *Suranaree University of Technology, Nakhon Ratchasima, Thailand*  
115 *Technical University of Košice, Košice, Slovakia*  
116 *Technical University of Split FESB, Split, Croatia*  
117 *The Henryk Niewodniczanski Institute of Nuclear Physics, Polish Academy of Sciences, Cracow, Poland*  
118 *The University of Texas at Austin, Physics Department, Austin, Texas, U.S.A.*  
119 *Universidad Autónoma de Sinaloa, Culiacán, Mexico*  
120 *Universidade de São Paulo (USP), São Paulo, Brazil*  
121 *Universidade Estadual de Campinas (UNICAMP), Campinas, Brazil*  
122 *University of Houston, Houston, Texas, United States*  
123 *University of Jyväskylä, Jyväskylä, Finland*  
124 *University of Liverpool, Liverpool, United Kingdom*  
125 *University of Tennessee, Knoxville, Tennessee, United States*  
126 *University of the Witwatersrand, Johannesburg, South Africa*  
127 *University of Tokyo, Tokyo, Japan*  
128 *University of Tsukuba, Tsukuba, Japan*  
129 *University of Zagreb, Zagreb, Croatia*  
130 *Université de Lyon, Université Lyon 1, CNRS/IN2P3, IPN-Lyon, Villeurbanne, France*  
131 *V. Fock Institute for Physics, St. Petersburg State University, St. Petersburg, Russia*  
132 *Variable Energy Cyclotron Centre, Kolkata, India*  
133 *Vinča Institute of Nuclear Sciences, Belgrade, Serbia*  
134 *Warsaw University of Technology, Warsaw, Poland*  
135 *Wayne State University, Detroit, Michigan, United States*  
136 *Wigner Research Centre for Physics, Hungarian Academy of Sciences, Budapest, Hungary*  
137 *Yale University, New Haven, Connecticut, United States*  
138 *Yonsei University, Seoul, South Korea*  
139 *Zentrum für Technologietransfer und Telekommunikation (ZTT), Fachhochschule Worms, Worms, Germany*
